International Debt Statistics 2018 focuses on financial flows, trends in external debt, and other major financial indicators for low-, and middle-income countries. This edition of International Debt Statistics (IDS) has been reconfigured to offer a more condensed presentation of the principal indicators. Appendix at the back of this book. Aggregate Measures for Income Groups and Regions. Aggregate measures for income groups and regions include the 123 low- and middle-income countries that report public and publicly guaranteed external debt to the World Bank’s DRS, whenever data are available. The aggregate for all low- and middle-income countries is the sum of data for 123 countries.

Classification of Countries. Choose your country's store to see books available for purchase. Choose Store. Add to cart. Edited by Zubair Iqbal and Ravi Kanbur, this volume consists of papers presented at a joint IMF and World Bank conference on external financing for low-income countries. The primary focus was on the impact of external indebtedness on low-income countries, mainly in sub-Saharan Africa, the HIPC Debt initiative, the determinants and role of private capital flow, policies that could be implemented to catalyze private capital flows, and the appropriate role for official finance in the period ahead. Do Middle-Income Countries Get More Aid than Low-Income Countries? The IMF has estimated that in order to meet the SDGs in five thematic areas, LICs will need to increase their tax-to-GDP ratio by 5 percent by 2030. How feasible is this target? The billions to trillions narrative for financing the SDGs depends heavily on mobilizing private capital for financing development programs.
