

The book festival provides an intriguing instance of the overlapping cultural, social and economic dimensions of contemporary literary culture. This article proposes the application of a new conceptual framework, that of game-inspired thinking, to the study of book festivals. Game-inspired thinking uses games as metaphors that concentrate and exaggerate aspects of cultural phenomena in order to produce new knowledge about their operations. It is also an arts-informed methodology that offers a mid-level perspective between empirical case studies and abstract models.
