There is a weird conspiracy theory that the whole of Antarctica and the South Pole do not exist. This belief is most common among flat-earthers who claim that our planet is flat. Flat-earthers believe that the North Pole is at the center of the world while the South Pole surrounds the Earth. According to flat-earthers, Antarctica is actually a thick wall about 30â€”60 meters (100â€”200 ft) high that surrounds our planet. The wall stops everything from falling over the edge of the Earth. Flat-earthers say we cannot confirm the existence of the wall because world governments and the United Nations h Antarctica was teeming with both animal and plant life and the landscape was largely flat and demarcated by a slow moving river. Through analyzing the sediments both offshore and along the coast, in 2013 it was determined that around 34 to 24 million years ago the glaciers began carving out the steep mountain ranges and valleys that lay under today's icecap. Fast forwarding to the twentieth century and Hitler's passion for utilizing ancient occult knowledge and exploration that he was certain would aid his ambitions promoting his Aryan "super race" as earth's self-anointed rulers, the German dictator's undeniable connection to Antarctica runs deeper than the thick two to four mile ice shelf covering the continent. The North Pole, also known as the Geographic North Pole or Terrestrial North Pole, is the point in the Northern Hemisphere where the Earth's axis of rotation meets its surface. It is called the True North Pole to distinguish from the Magnetic North Pole. The North Pole is the northernmost point on the Earth, lying diametrically opposite the South Pole. It defines geodetic latitude 90Â° North, as well as the direction of true north. At the North Pole all directions point south; all lines of longitude
