effectiveness of the Regulations, including an assessment of the associated advantages and disadvantages of such options. With regard to the effectiveness of EU import restrictions, the study found that, in some cases, these have contributed to more sustainable exploitation in the Range States but that in other cases the trade may simply have shifted elsewhere, leaving original concerns unaddressed. Moving to the topics that were subject to more detailed analysis, with regard to the question of alignment of the Annexes to Regulation 338/97 with the Appendices to the Convention, a number of issues were identified. Evaluating the Effectiveness of NGOs – Significance of Civil Society – How Effective Are NGOs for Civil Society? – Can NGOs Become More Effective? – Dearth of Effective Tools for Success – Global Trends for Year 2025 - A Transformed World. In the nomenclature of names for NGOs (see NGO Abbreviations in Section VIII), the paper will breakdown the two main categories of NGOs-intermediary and community-based. Section III demonstrates examples of intergovernmental organization (> IGOs) such as the United Nations, World Bank and the World Trade Organization (WTO) and how they view the role of NGOs. In evaluating the effectiveness of NGOs, Section IV discusses the lack of accountability measures not used to grant or review NGO status. Testing the Spoken English of Young Norwegians: a study of testing validity and the role of “smallwords” in contributing to pupils’ fluency Angela Hasselgren. Changing language teaching through language testing: A washback study Liying Cheng. ALTE recognises that the field of language testing in different languages will be at different stages of development and that developing a language testing capacity in the European context, albeit in a relatively narrow domain, is an on-going venture. Similarly, progress, in contexts where participants are free to walk away at any time, cannot be achieved through force or coercion but rather through involvement, greater understanding and personal commitment. This is an open event, details of which are available on the ALTE website. However, fast development of information-and-subject environments in different languages may be observed on the Internet. A trained specialist who is expected to find his/her niche within rapidly developing technologies of developed countries should be well-informed in his area. Modern means of connecting with partners, access to the Internet information resources assume proficient command of not only computer technologies but also foreign languages. Distance foreign language teaching is an essential component of the developing open education system. ICT implementation in educational process in general and in the process of distance foreign language teaching in particular allows realising the concept of Life Long Learning.
