Corporate Finance forms the most basic component of how a business is run. I am sure you would be interested to know why. But before we dig into the details of this broad area, letâ€™s take this example.Â Corporate finance also measures the return on a planned investment decisions by comparing it to the minimum tolerable hurdle rate and deciding if the project/investment is feasible to be undertaken. 2. Financing Principle. Most often businesses are funded with either debt or equity or both. Corporate finance is the area of finance that deals with sources of funding, the capital structure of corporations, the actions that managers take to increase the value of the firm to the shareholders, and the tools and analysis used to allocate financial resources. The primary goal of corporate finance is to maximize or increase shareholder value. Correspondingly, corporate finance comprises two main sub-disciplines.Capital budgeting is concerned with the setting of criteria about which value-adding
