I Just Wanna Be Average

Ken Harvey was gasping for air. School can be a tremendously disorienting place. No matter how bad the school, you’re going to encounter notions that don’t fit with the assumptions and beliefs that you grew up with—maybe you’ll hear these dissonant notions from teachers, maybe from the other students, and maybe you’ll read them. You’ll also be thrown in with all kinds of kids from all kinds of backgrounds, and that can be unsettling—this is especially true in places of rich ethnic and linguistic mix, like the L.A. basin. You’ll see a handful of students far excel you in courses that sound exotic and that are only in the curriculum of the elite: French, physics, trigonometry. And all this is happening while you’re trying to shape an identity; your body is changing, and your emotions are running wild. If you’re a working-class kid in the vocational track, the options you’ll have to deal with this will be constrained in certain ways: You’re defined by your school as “slow”; you’re placed in a curriculum that isn’t designed to liberate you but to occupy you, or, if you’re lucky, train you, though the training is for work the society does not esteem; other students are picking up the cues from your school and your curriculum and interacting with you in particular ways. If you’re a kid like Ted Richard, you turn your back on all this and let your mind roam where it may. But youngsters like Ted are rare. What Ken and so many others do is protect themselves from such suffocating madness by taking on with a vengeance the identity implied in the vocational track. Reject the confusion and frustration by openly defining yourself as the Common Joe.
I Just Wanna Be Average

Champion the average. Rely on your own good sense. Fuck this bullshit. Bullshit, of course, is everything you—and the others—fear is beyond you: books, essays, tests, academic scrambling, complexity, scientific reasoning, philosophical inquiry.

The tragedy is that you have to twist the knife in your own gray matter to make this defense work. You’ll have to shut down, have to reject intellectual stimuli or diffuse them with sarcasm, have to cultivate stupidity, have to convert boredom from a malady into a way of confronting the world. Keep your vocabulary simple, act stoned when you’re not or act more stoned than you are, flaunt ignorance, materialize your dreams. It is a powerful and effective defense—it neutralizes the insult and the frustration of being a vocational kid and, when perfected, it drives teachers up the wall, a delightful secondary effect. But like all strong magic, it exacts a price.

Mike Rose is the son of working class Italian-immigrant parents who settled in South Los Angeles in the 1950s. Rose, a long-time advocate for underrepresented students in higher education, is an award-winning non-fiction writer.

He is the recipient of numerous writing and educator awards, including a Guggenheim Fellowship, the David H. Russell Award for Distinguished Research in the Teaching of English from NCTE, UCLA’s Distinguished Teaching Award in 2005, and winner of the Commonwealth Club of California Award for Literary Excellence in Nonfiction.

Lives on the Boundary by Mike Rose is a 1989 work of non-fiction that explores the challenges and successes associated with literacy at the margins of America's education system. Much of the work is autobiographical and explores Rose's own challenges both learning and teaching reading and writing. The narrative base helps the reader form a personal connection to Rose, his colleagues, and his students. This book ultimately gives a voice to those marginalized by America's education system. Legacy. First published in 1989, Lives on the Boundary has gone on to become one of the most significant books in the field of education. In addition to being a bestselling book, Lives on the Boundary is the recipient of the National Council of Teachers of English David H. Livingstone Award. The book is a first person account composed of eight chapters each of which treat a different obstacle faced by Mike Rose in his years as a student and as an educator.
