Introduced shortly after the American Civil War, the very first Winchester, the M1866, would go on to see military service as far afield as Bulgaria, but it was in the hands of civilians that it would become known as 'The gun that won the west.' The Winchester 1895 rifle has been developed by famous designer John Moses Browning as a hunting rifle, capable to safely handle long and powerful rifle ammunition, unsuitable for earlier Winchester lever-action rifles. Of about 426 thousands of M1895 rifles, made made by Winchester between 1895 and 1931, about 300 thousands were made on Russian military contract between 1915 and 1917. Of those, about 293 000 rifles reached the Russia before the revolution broke out.Â Compared to contemporary military-type bolt action rifles, Winchester M1895 rifles were slightly faster to operate, thanks to its lever-action system; in Russian pattern these rifles also were fitted with clip guides, which allowed for faster reloading. Developed from the 1860 Henry rifle, Winchester rifles were among the earliest repeaters. The Model 1873 was particularly successful, being marketed by the manufacturer as "The Gun That Won the West." In 1848, Walter Hunt of New York patented his "Volition Repeating Rifle" incorporating a tubular magazine, which was operated by two levers and complex Winchester Lever-Action repeating rifles are an integral part of the folklore of the American West.
