The Archaeological Journal, Volume 42 1885 Royal Archaeological Institute., 1885

The Archaeological Journal is a peer-reviewed academic journal for archaeological and architectural reports and articles. It was established in 1844 by the British Archaeological Association as a quarterly journal, but was taken over by the British Archaeological Institute (now known as the Royal Archaeological Institute) in 1845, and the Institute has remained its publisher ever since. The journal has been published annually since 1927. The Near East Archaeological Society Bulletin (NEASB), the society’s journal, covers a range of topics including archaeological reports, general pieces on archaeology and the Bible, book reviews, and artifact analysis—complete with images and diagrams. Founded in 1957, the Near East Archaeological Society (NEAS) is built around researching the Bible’s geographical setting—the modern Middle East—with an evangelical perspective. The Near East Archaeological Society Bulletin (NEASB), the society’s journal, covers a range of topics including archaeological reports, general pieces on archaeology and the Bible, book reviews, and artifact analysis—complete with images and diagrams.
