SYNOPSIS OF STORY: This book covers a wide range of inventions throughout history. Each section is separated by category or time period. Periods covered include Classical, Middle Ages, The Renaissance, and specific centuries and decades. The book talks about everything from fire and wheels to telescopes and microscopes to microwaves and CDs. Each invention has a small caption with information about each.

THEME: Inventions, Ideas

ACTIVITY ONE:

Origin: Original of my own

Objective:
- After designing a car, the students will test their design against others.

Learn about the process of improving an invention. Use different objects such as boxes, lids, straws, etc. to make a “car” that will roll down a ramp. Test different designs to see which will roll better and further. Have a contest at the end of the project to see which group’s car goes farther.

ACTIVITY TWO:

Origin: Original of my own

Objectives:
- After learning about inventions, the student will view an invention that has progressed and changed over time.

Show the class how inventions have improved and progressed over time. Music can be used as an example. Bring in old records, 8 tracks, cassettes, CDs, and MP3 players. Let the class interact with the objects and hear how they sound.

Includes student research book that will work for any inventor studied as well as three bonus activities! Mrs Schimke. A vocabulary list featuring The Ingenious Lexicon of Invention. Whether you’re an ingenious inventor or you just geek out on gadgets, here are some useful words to describe the process of innovation. Check out the related article from our Department of Word Lists: The Innovative Language of Invention. This is different from the noun meaning a book of fiction. As an adjective, novel means new, fresh, innovative, unprecedented. A novel idea is the opposite of a tired, old-timey idea: a novel turn of phrase is the opposite of a cliché. Inventors chase the novel. Patent. a document granting an inventor sole rights to an invention. Of course, all those wild, futuristic ideas still rest inside a patent application for now. The following is a list of inventions made in the medieval Islamic world, especially during the Islamic Golden Age, as well as in later states of the Age of the Islamic Gunpowders such as the Ottoman and Mughal empires. The Islamic Golden Age was a period of cultural, economic and scientific flourishing in the history of Islam, traditionally dated from the eighth century to the fourteenth century, with several contemporary scholars dating the end of the era to the fifteenth or sixteenth century.
